1. Summary of the proposed ordinance (must include a statement of the public purpose, such as serving the public health, safety, morals, and welfare): **The proposed ordinance amends the Land Development Code to update and clarify definitions related to trees by refining and standardizing the terminology used for various tree classifications. The revisions clearly distinguish between different types to ensure consistent interpretation and application of the code by property owners, developers, and County staff. These clarifications are intended to eliminate ambiguity, improve administrative efficiency, and support uniform enforcement of tree-related regulations. Accurate and well-defined tree classifications support effective environmental protection, enhance community aesthetics, and facilitate responsible land development. By improving clarity and reducing confusion, the ordinance helps prevent disputes, supports compliance, and ensures that tree preservation and replacement requirements are applied equitably, thereby advancing the overall welfare of the community.**

2. An estimate of the direct economic impact of the proposed ordinance on private, for-profit businesses in unincorporated Marion County, if any:

(a) An estimate of direct compliance costs that businesses may reasonably incur;

(b) Any new charge or fee imposed by the proposed ordinance or for which businesses will be financially responsible;

(c) An estimate of Marion County regulatory costs, including estimated revenues from any new charges or fees to cover such costs. **N/A**

The ordinance clarifies the definitions of trees that could have a negative fiscal impact on private, for-profit businesses and their ability to develop.

3. Good faith estimate of the number of businesses likely to be impacted by the proposed ordinance: **Unknown at this time, however, there are over 14,000 businesses in Marion County.**

4. Additional information the governing body deems useful (if any): **Proposed changes to the definitions of different classifications of trees provides clarity in terminology.**
