Ocala, FL 34470

**RE: Marion County MSTU – Cedar Hills
Final Certification**

Dear Ms. Stowe:

Based on our recent inspections, we have found construction of the Cedar Hills pavement improvement project to be satisfactory and acceptable, subject to any requirements of which MSTU has separately notified the contractor.

The final inspection of approximately 4 miles of road was completed on August 19, 2024. These roads are included in the subdivisions of Cedar Hills, as recorded in Plat Book H, Page 31; Cedar Hills Addition, as recorded in Plat Book H, Page 44; and Cedar Hills Addition 2, as recorded in Plat Book Q, Page 94.

The project is certified complete based on the original design and according to the field changes during construction as coordinated with MSTU.

Sincerely,
Michael W. Radcliffe Engineering, Inc.

Michael W. Radcliffe, P.E.
