Chris,

I rode around the entire property yesterday and I took these typical photos of showing how thick the vegetation is. It's pretty thick everywhere and corroborated by the aerial.

I couldn't get to the exact eastern spot in question without going on private property but photo 2 (with the houses) is looking into the property from the east like the Scruggs' current view.

(The beige house is just south of the Scruggs' property)

Photo 1 and 4 are looking into the site from the north and photo 3 is looking into the site from the south.

Best I could do.

Thanks,

MICHAEL W. RADCLIFFE, P. E.

For the Existing Natural Buffer Vegetation photo set – do you have a “Key” to the photo locations and their viewing direction?
