

## Ward Diesel- No Smoke Exhaust System

Direct capture system for new and existing apparatus:

Benefits of this system design include:

- A. No moving parts
- B. Vehicle mounted, no building modification necessary
- C. Supplemental treatment continues outside of building
- D. Can be placed on new vehicles or vehicles already in service
- E. Available for both horizontal and vertical exhaust systems
- F. Overall cost savings on system when compared to Plymovent.

Disadvantages of current direct capture system (Plymovent)

- A. Require building modifications
- B. Requires personnel to reconnect the hose when returning to be effective
- C. May require ongoing maintenance/repair
- D. Secondary to vehicle modifications in exhaust, second hose connections drops are being required at multiple stations.
