Detailed Description/Scope of Work Grant Information (if applicable)

4 Lucas Devices are needed for equipment stock for use with spare rescues, in the case that there is any equipment that is broken or if a spare rescue is put in service. The LUCAS device has been shown to improve quality of chest compressions, increase ETCO2 levels compared to manual CPR, as well as being able to sustain life-saving circulation during prolonged resuscitation attempts. LUCAS has been studied extensively, shown to be as safe and effective as high-quality manual CPR and to save patients that would otherwise have been considered futile.

Additional Information/County Admin. Notes for Agenda

The LUCAS device has been shown to improve quality of chest compressions, increase ETCO2 levels compared to manual CPR, as well as being able to sustain life-saving circulation during prolonged resuscitation attempts. LUCAS has been studied extensively, shown to be as safe and effective as high-quality manual CPR and to save patients that would otherwise have been considered futile.
