<b>A potential of twelve (12) full cycles, Each fiscal year. Fiscal year is October 1st to September 30th.</b>			

The CONTRACTOR is to furnish all labor, equipment, work signs, tools and other incidentals to execute all work necessary to perform the specified sweeping work listed in these documents. This work will be furnished in accordance with all conditions specified in the contract documents. All roads within the boundaries of Marion County are eligible for work under this contract as authorized by the County Engineer or designee, additions must be agreed upon by the CONTRACTOR. The CONTRACTOR may be required to attend pre-scheduled meetings as necessary determined by the COUNTY ENGINEER or designee without additional compensation.

There are periods of the year when it can be expected that street sweeping will not be feasible due to weather conditions. The CONTRACTOR is responsible for notifying the County Engineer or designee if unsuitable weather conditions are encountered. If the County determines the weather conditions are unsuitable for sweeping operations the County Engineer or representative will direct the CONTRACTOR to discontinue sweeping in specific areas during a cycle under these circumstances until which time there are suitable weather conditions. Roads not swept due to these conditions will not be authorized for compensation.

## 2.5 CYCLE TIME

Each cycle is twenty-five (25) days long. Each cycle will start on the 1<sup>st</sup> day of the month and continue to the 25<sup>th</sup>. Allowing some time in between cycles for the contractor to make any necessary adjustments to the equipment and/or scheduling as needed.

## 2.6 HOURS OF OPERATION

Marion County operating hours are from 08:00 to 17:00 Monday thru Friday. There will be no sweeping on any major Holidays. IE Labor Day, Independence Day, Thanksgiving and the day after, Christmas Eve and Christmas Day, and New Year's Day.

## 2.7 EQUIPMENT

Minimum requirements for Street Sweepers are:

Shall be four-wheeled with two drive wheels. The engine horsepower shall be minimum 110 brake horse power. Water capacity shall be 225 gallons minimum. Width including pickup and gutter broom shall be at least 114 inches. Street Sweeper shall be equipped with back up alarm and FDOT approved arrow board. Street Sweeper shall be USDOT FHWA PM 10 compliant and operate either by vacuum or regenerative air in conjunction with brushes. Mechanical street sweepers will be allowed if they can demonstrate the ability to comply with these specifications and furnish a high-quality finished product.

The sweeper must carry water, which is used for dust control. Dust clouds shall not be allowed to form as a result of the sweeping.

All equipment necessary for the proper execution of the Contract shall be maintained to produce quality work. The CONTRACTOR shall maintain at least one (1) backup sweeper of equal or greater capacity to ensure continuity of operations.

The CONTRACTOR must have the capabilities at the time of submission of Proposal to perform promptly after the Notice to Proceed. The CONTRACTOR shall submit with his Proposal a list of the quantity and types of equipment and employees, which shall be used in the performance of this contract. The CONTRACTOR has the option to choose the type of equipment needed to perform any given task, as long as the equipment meets minimum requirements as specified in these documents and is of substance and function that allows the work to be completed according to contract specifications. No extra costs will be incurred by the County for the rework of specific areas that are unacceptable due to equipment or operator.

## 2.8 RESPONSIBILITY FOR LAYOUT OF WORK

The CONTRACTOR will supply the County with a route and projected timeline for completion of each cycle. This timeline should allow for weekends and holidays and project the completion of each cycle within the cycle period indicated in the section titled "**SCOPE OF WORK**".

## 2.9 QUALITY CONTROL AND INSPECTION

The CONTRACTOR shall submit a list of work completed by the item number from **Tables 1 & 2 from Exhibit A** with debris disposal measured in tons/yards to the County every morning no later than 08:30 A.M. This will be accomplished by email. This will enable the County to complete inspections before the CONTRACTOR moves great distances from the completed work area allowing the CONTRACTOR to perform faster and more cost-effective re-works should the need arise.

In the event that re-worked areas are not accepted after the first re-work is completed, the CONTRACTOR will deduct from the invoice an amount equal to the cost of having the County perform a second re-work inspection and any subsequent re-work inspections.

The CONTRACTOR shall attend a coordination meeting with the Project Manager and provide sweeping routes and schedules for the purpose of scheduling inspections and modifications to the route, prior to any work being accomplished. This does not, however, relieve the CONTRACTOR from responsibilities specified in the Scope of Services.

## 2.10 MEASUREMENT AND BASIS OF PAYMENT

The CONTRACTOR shall furnish complete pricing for accomplishing the required work, including a list of the equipment and personnel to be utilized, minimum requirements are listed in the sections titled "**SCOPE OF WORK**" and "**EQUIPMENT**", prior to execution of the contract.

CONTRACTOR may submit a signed invoice for payment at the end of each cycle, additionally the CONTRACTOR may submit an invoice when directed by the County to complete specific areas listed in Exhibit A or other areas agreed upon by both parties. No invoice will be processed until all miles associated with that cycle have been inspected and accepted.

Initial Contract Clean Up Cycle is one (1) cycle broken into two (2) months. Payment shall be per Unit price for only work that has been completed, inspected and accepted, which shall include travel lanes, curbs, gutters and inlets. CONTRACTOR may submit a signed invoice for payment at the end of January, additionally the CONTRACTOR may submit an invoice at the end of February for the remaining work from the Initial Contract Clean Up cycle.

**CONTRACTOR DEBRIS DISPOSAL.** The CONTRACTOR will be responsible for disposing of debris generated through this work in accordance with all laws and regulations having jurisdiction. The invoice will indicate the number of tons hauled each day and a grand total for the cycle when invoice is submitted.

All measurements are by curbed mile. The CONTRACTOR will be paid for the number of curbed miles completed and accepted.

In order to be accepted as complete, all sweeping must include travel lanes, turn lanes, approaches, curbs, turn radii, median breaks and inlets.

The **approximate** curb mileage identified in **Table 1** (Regular Curb & Gutter) to be swept monthly from April through December is 190.26 miles (Regular Including Extended Radii). The **approximate** curb mileage identified in **Table 2** (Subdivision) to be swept three (3) times per calendar year is 45.50 miles. **Marion County reserves the option to decrease the number of miles at the contract price per unit, or increase if agreed upon by both parties.** The CONTRACTOR shall be compensated for each cycle at the unit price per curbed mile to the nearest hundredth (0.01), completed and accepted. The anticipated routes to be swept are identified in the **Overall Location Map** and **Tables 1 and 2**, all provided in **Exhibit A**. A cycle is defined as a completed round of sweeping which incorporates all the roads included on the list in **Exhibit A** and shown on the maps provided. Each cycle shall include all additional mileage or work appended to the contract under the available contingency.

A separate category is identified as Bilateral Turn Lanes. An example of a road with a bilateral turn lane that would be representative of this category is Maricamp Road. Sweeping of these road sections will be done at the request of and paid for by the OCE's Road Operations Section. The quantities of work in this contract will vary due to changes in areas of exclusion, weather conditions, and limits of construction and other indeterminate variables.

## 2.11 LIQUIDATED DAMAGES

Liquidated damages (LD'S) will be charged for each calendar day a cycle is late or not completed in its entirety. The actual liquidated damage amount will be deducted from the invoice for the particular cycle that is late. If the County has previously approved a day for day extension for inclement weather or unforeseen circumstances per specification 2.4, that extension will be taken into consideration when determining if the cycle is considered to be late. The amount will be calculated by the following: cost of the total cycle divided by 25 days without time extensions, multiplied by the number of days late. Example would be: Awarded cycle totals \$5,000.00 per cycle divided by 25 days for the cycle, multiplied by 3 days for being late, would equal liquidated damages in the amount of \$600.00 which would automatically be deducted from the invoice.  $((\$5,000/25)*3)=\$600.00$

## 2.12 ADDITIONAL REQUIREMENTS

The CONTRACTOR will inspect the proposed routes to become familiar with the conditions prior to submitting a Bid. *It is in the CONTRACTOR's best interest and highly recommended for CONTRACTOR to visit the routes before submitting a Bid.*

The anticipated initial fiscal year sweep cycle for routes listed in **Tables 1 (Regular)** will begin as directed by the County, typically in October and subsequent cycles will continue thru September. The cycles shall be completed in twenty-five (25) calendar days and will include approximately twelve (12) anticipated cycles per year.

The anticipated initial fiscal year sweep cycle for routes listed in **Table 2 (subdivisions)** will begin as directed by the County, typically in October, followed by subsequent cycles in January, April and July. The cycles shall be completed in conjunction with Regular curb and gutter in twenty-five (25) calendar days and will include approximately four (4) cycles per year.

The number of cycles or time period between sweeping cycles may be reduced or extended at the County's discretion due to circumstances, which include weather, natural disasters and budgetary concerns.

## 2.13 COUNTY'S RIGHT TO STOP WORK

Suspension for Convenience. The County may direct the CONTRACTOR to stop the Work, in whole or in part, whenever, in the County's sole judgment and discretion, such stoppage is necessary to ensure the proper completion of the Work, avoid injury to third persons, or otherwise meet the objectives of the County. The County shall provide CONTRACTOR not less than five (5) days written notice, except in emergency circumstances.
