Market Analysis for RAC Land Use Amendment/ Rezoning

PARCEL: 13002-000-00

1. Define Your Objective- This 23.09-acre parcel is currently zoned A-1 (General Agriculture with Rural Land Use. A portion of it was being utilized as a plant and tree nursery while still having residency on site. The purpose of this request is to amend the Land Use and zoning to Rural Activity Center (RAC) to be able to conduct a Landscape Contract Yard / Farm Building Sales/Service/Storage. This will include a small building to sell accessory items and parts for products sold.
2. Industry Overview- As mentioned the site previously was being used as a Plant/tree nursery with sales to public. As more and more people move into this area there is a need for the type of product and service being proposed. The NW area is primarily farms or homes. The service of both Farm Buildings and landscaping is always in high demand. The ability to expand sales to include both general public and contractors is warranted.
3. Target Market/Competitive Analysis- This is in the Rural Area, according to the map attached the closest similar business is located in the Urban Area. Allowance of this change to RAC would meet the intent of the RAC which is to provide for the shopping and limited services needed by residents in the rural area, and encourage and allow for mixed use nodes of residential (single-family and multi-family), commercial uses, and agricultural-related commercial uses to meet the daily needs of residents in the Rural Area to reduce trips to the urban areas of the county for daily needs and services.
4. Market Trends/ Market Projection- The proposed use of this site is in line with a use that would accommodate the primary use of this area. This area is designated Farmland Preservation Area. The product we provide and the service we offer is compatible with the surrounding area. Our goal is to provide a workplace that works with the community, for the community, and within the community. We have had discussions with the adjacent business, and it is understood that our proposed use is not in conflict.

MEMORANDUM

Date:	November 7, 2024	Project #: 31047
To:	Mr. Tommy Moore 7575 W. Highway 316 Reddick, FL 32686	
From:	Kok Wan Mah, PE	
Project:	Tommy Moore Plant Nursery	
Subject:	Traffic Statement, request to waive traffic impact study	

Introduction

The purpose of this memorandum is to provide a Traffic Statement as required by Marion County to support a request to waive a traffic impact study for the Tommy Moore Plant Nursery site based on the requirements and thresholds set forth in Marion County Land Development Code, Section 6.11.3(A), which requires a Traffic Statement for projects forecasted to generate fewer than 50 peak-hour trips. The site is located on the north side of CR 326, east of NW Highway 225A in Marion County, Florida. Access to the site is on CR 326. The existing site includes a combination of wholesale and retail plant nursery, including sales of gardening tools and agriculture buildings, and ancillary uses related to the operation and maintenance of the nursery on approximately 23.62 acres. A 1,500 square foot building comprises of the retail center. The parcel ID is 13002-000-00. A site plan is attached.

The site seeks to change the future land use designation from Rural land use to Rural Activity Center (RAC) and change the zoning from A-1 to Rural Activity Center (RAC).

Trip Generation Summary and Site Operations

A summary of trip generation is shown below in **Table 1** between the highest and best use under the current future land use and zoning designation (Rural, A-1) and proposed future land use and zoning designation (RAC, RAC). Under the Rural and A-1 designations, single family residential was chosen with a maximum density of one unit per 10 acres (based on 23.62 acres). For the proposed RAC designation, a shopping center land use was chosen as the highest and best use. Using a maximum FAR of 0.35 per Article 4, Division 2, Section 4.2.24(D) of the Marion County Land Development Code yields a maximum of 360,110 square feet of retail.

As shown in **Table 1**, the comparison of highest and best use between the current and proposed FLU and zoning designations results in an increase of 13,300 daily trips, 300 AM peak-hour trips, and 1,221 PM peak-hour trips. The trip generation for the proposed development program is shown in **Table 2**, which yields 9 AM peak-hour trips and 18 PM peak-hour trips.

Site Plan/Driveway Access Assessment

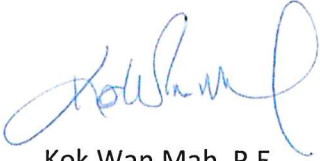

The site plan is being reviewed to provide recommendations to the County related to site access, circulation, and access management. The comments are as follows:

- Current access to the site is a full connection to CR 326. Based on the projected trip generation of the proposed development program, no additional improvements are needed at the driveway.
- Based on a preliminary assessment, there do not appear to be any issues related to sight lines at the driveways. An AUTOTURN analysis was not provided, however circulation space for emergency service vehicles appears adequate. Additional review comments may be provided by the fire department.

Conclusion

In conclusion, the proposed plant nursery site is expected to be a low trip generator, producing a maximum of 18 trips during the peak-hour. A request is made to the County to waive the requirement for a traffic study. We appreciate the County's consideration of this request.

Sincerely,
