RE: Surplus Fire Equipment

Chief Banta,

Levy County Department of Public Safety is aware that Marion County Fire Rescue may have a surplus fire engine; 1993 E-One Sentry Pumper (property #26244). If this unit is available, Levy County is interested in receiving it as a donation.

If donated, this equipment would be placed in service and will assist in serving the citizens and visitors of Levy County. As of recent, our frontline and spare units have been in the shop for major repairs leaving us with limited options should we receive a call where an engine would be required.

Levy County would also be interested in any other surplus units you may have coming available as well.

As always, we appreciate all of the support Marion County Fire Rescue has offered.

Respectfully,

James M. Harrell

JMH/amr
