The intent is to ensure that equivalent flood plain volume and conveyance is maintained. This section also supplements Division 5.3 Flood Plain Overlay Zone. B. Land use activities which materially change the flood plain may be permitted when calculations performed by a licensed professional are provided demonstrating that compensating storage or other hydraulic characteristics are provided on the owner's property or within an easement. The calculations shall be reviewed and approved by the County Engineer or his designee. C. Land use activities that do not meet the thresholds for a stormwater analysis shall minimally be required to demonstrate one-for-one compensating storage, to be reviewed and approved by the County Engineer or his designee. D. When proposed improvements associated with mass grading plans, major site plans or improvement plans encroach into a flood hazard zone, it shall be necessary for the applicant to file a map amendment or revision with FEMA.
