

~~18'~~ Grapppler Trailer with 16' Dump
20'

This drawing is to scale for 18' Trailer and 16' Dump
We will however, build to 20' Trailer with 16' Dump.

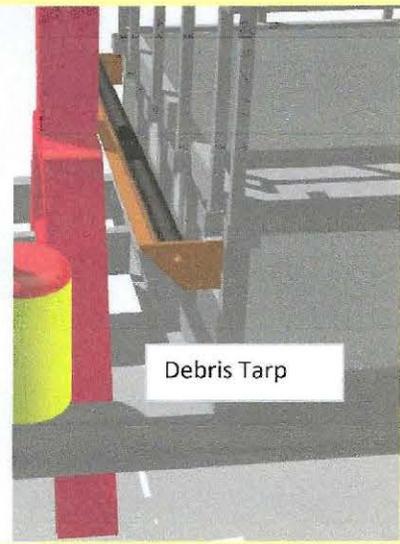

The reason for this change is to allow for a safer more functional platform for the Grapppler operator

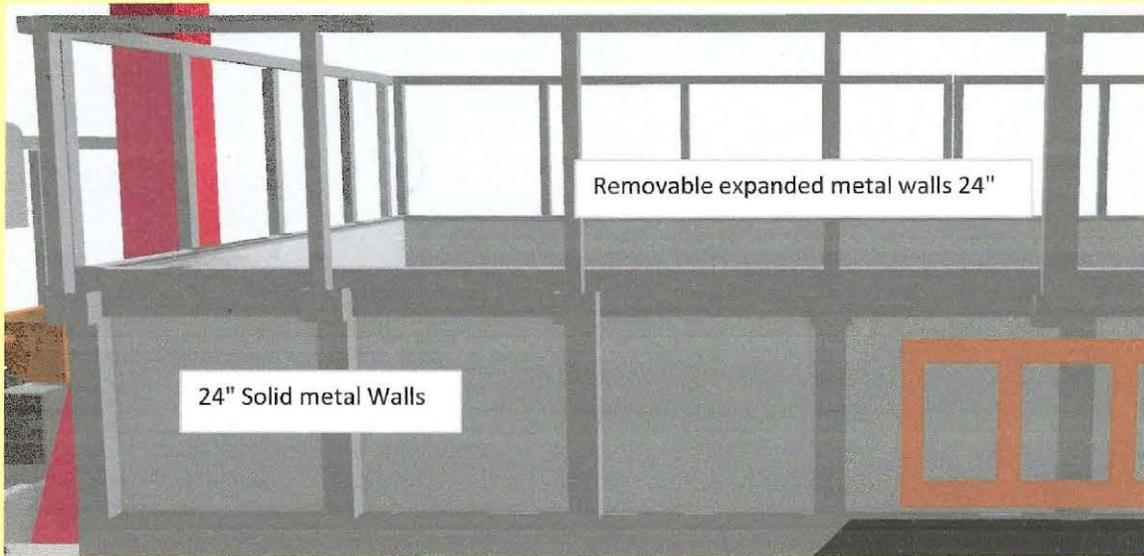

Hand Tool Rings

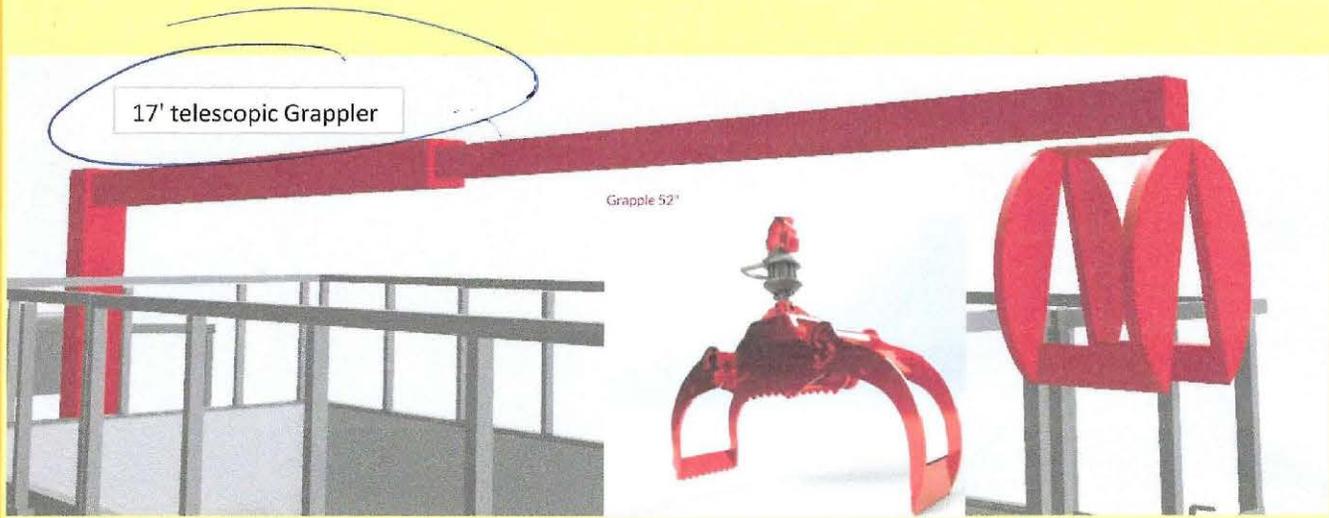

Debris Tarp

Removable expanded metal walls 24"

24" Solid metal Walls

17' telescopic Grappler

Grapple 52"

A few important points regarding this special order:

- **Deck Scale Extension:** We must extend the deck scale from **18'** to **20'** to ensure safe grapple operation (the current setup is too tight). This extension has been included in the attached quote, as the cost is negligible.
- **Grapple Model:** The quote is for our highest-spec model, the **170 HDT** with a 3ft telescopic boom. This model comes standard with the largest available attachment grapple (Model #57-021).
- **Lead Time:** The grapple is a special order, requiring import from Quebec. The lead time is estimated at **8-10 weeks**. Our costs include all current tariffs in place and guarantee of 90 days.

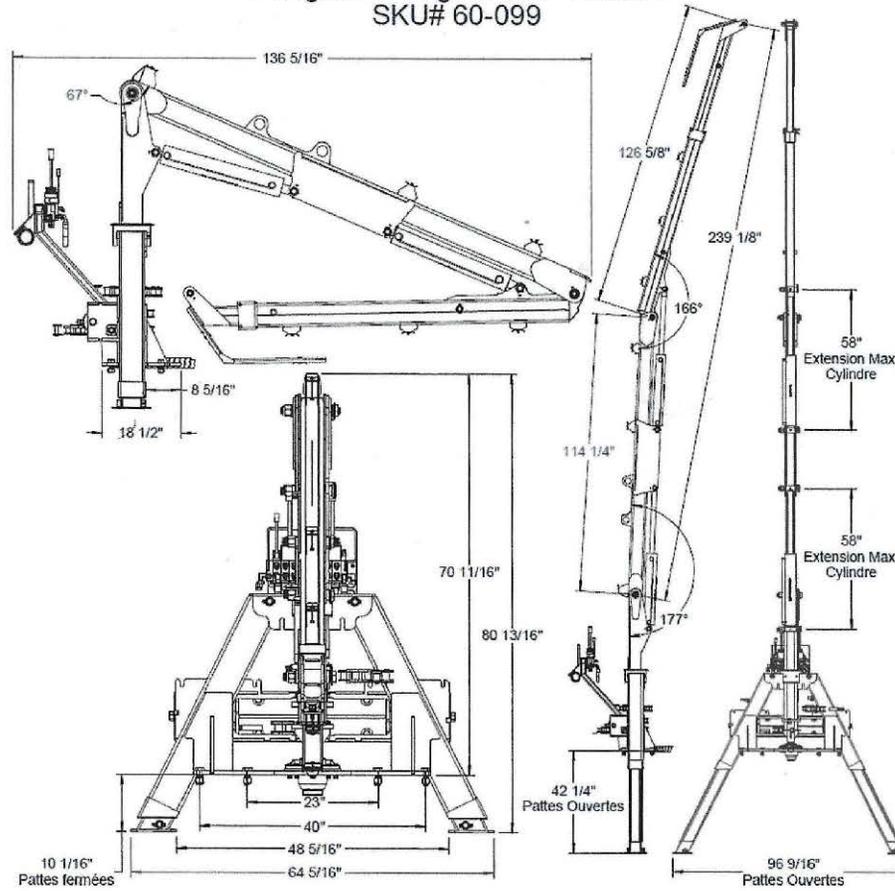

60-099 | 170 HD-T

constructed of sturdy and durable material, the 170-HDT Woody Telescopic Log Loader model equipped with a 17' boom a 3' telescopic hydraulic boom extension makes it ideal for tractors from 90 HP and more, skidders and trucks.
