REMARKS: **DISCUSSION REQUIRED/DENY:** This Waiver Application is one of at least 27 of the 177 lots (15.25%) (for now) in the Grand Park North Subdivision built in 2007 that remained dormant until now. The subdivision consists of 177 lots and their internal street network. This individual application proposes an additional impervious surface exceeding the lots original maximum impervious surface amount, in this case (281 SF for this lot). The total approval amount above impervious area is 12,477 SF with an average of 462 SF.

The 27 lots, if at a similar rate of 462 SF, would result in gross increase of 12,477 SF - essentially almost equal to the max coverage allowed for 4 single lot. If similar applications are submitted for all of the subdivision lots, the gross increase in total impervious surface would be $177 * 462 = 81,774$ SF (exceeding a 1-acre equivalent based on 177 lots at 462 SF per lot). This request, given the other waiver applications and the potential for more, should instead be considered as a gross waiver to the overall subdivision - the Improvement Plan for instance - that is supported by sufficient data and analysis that the subdivision design will accommodate the gross impervious surface increase. Staff further notes that while "HOA" acceptance regarding responsibility for the stormwater increase is a historic practice, the subdivision is functionally owned by a developer that oversees the HOA, and once all sales are completed the responsibility will fall to individual property owners and the resulting actual "HOA" without providing any additional data regarding the long-term stormwater design impacts, and further, added other impervious additions may then be sought when other accessory improvements are proposed (e.g., swimming pools, extended patios/driveways, etc.). The site is within the Rainbow Springs Primary Protection Zone.

Initial 12 waivers over by 5,228 SF (Previous waivers)

Last 8 waivers over by 4,492 SF (Previous waivers)

REVIEW ITEM: LDC 2.21.1 Major Site Plan
STATUS OF REVIEW: INFO
REMARKS: **APPROVED**. The HOA/POA (O&M Entity) has provided a letter accepting the additional runoff in excess of 281 sf (design impervious) into their subdivision's Master Stormwater System. Signed letter was submitted with the waiver request.

Note: The applicant owns a 0.3-acre lot (PID 33172-162-00) in the Grand Park North subdivision. There is 0 sf existing impervious coverage on the site. The project proposes to add 3,781 sf of impervious coverage. The Grand Park North subdivision assumes 3,500 sf impervious coverage per lot. Staff recommends approval with O&M Entity's acknowledgement and acceptance of the additional runoff to their system.

ACKNOWLEDGEMENT AND ACCEPTANCE OF ADDITIONAL STORMWATER / LETTER OF NO OBJECTION

The above referenced project is within the GRAND PARK NORTH subdivision, which has a privately-maintained stormwater management system. This stormwater management system is operated and maintained by the GRAND PARK NORTH COMMUNITY ASSOCIATION, INC. (name of maintenance entity). The subdivision Improvement Plans (AR# 2075) on file at the County show the stormwater facilities to be sufficient to accommodate the stormwater runoff from the 100 year-24 hour storm based on 3,500 square feet impervious coverage per lot. The above referenced lot currently has 0 square feet impervious coverage and the proposed project will add 3,781 square feet impervious coverage.
